On-Call.
Simplified.

AUTOMATE ON-CALL

—

ALERT & RESPOND

—

LEARN & IMPROVE

PagerTree does more than just alert. It simplifies every part of the on-call process, providing all the tools for incident creation, routing, resolution and analytics.

Today's technology industry demands 99.99999% uptime, 24/7. To be competitive you can't just keep up — you have to stay ahead.

With PagerTree, your technology team will have the tools they need to keep you and your business ahead of the competition.

- Reduce Mean Time To Repair (MTTR)
- Eliminate Administrative Overhead
- Automate Incident Creation
- Fight Alert Fatigue
- Send Multichannel Notifications
- Centralize Incident Management

pagertree

PagerTree is the simplest solution to on-call rotation. PagerTree streamlines the on-call process by making it easy to schedule rotations, route incoming incidents, and alert the right team members every time.

The outcome? Faster incident resolution times, more satisfied customers, and improved team efficiency.

Efficient teams choose PagerTree
SIMPLE AND SECURE

MOBILE NOTIFICATIONS

ALWAYS ON TECHNOLOGY

Simple. Secure. Reliable.

PagerTree is a cloud-based incident management tool that is simple, secure, and reliable. PagerTree uses enterprise-grade encryption to keep your data safe and runs in multiple data centers to guarantee uninterrupted service.

You can start using PagerTree in minutes. Create an account, invite your team, and integrate with the tools you already love. You can use PagerTree via the Web UI, smart phone apps, email, or SMS.
Why Choose PagerTree?

SOLVE PROBLEMS FASTER

Real-time incident notifications via SMS, email, and smart phone apps guarantee every incident is seen by your team fast.

NEVER MISS ALERTS

With on-call schedule layers and configurable escalation rules, your team will never miss an alert.

SEAMLESS INCIDENT RESPONSE

From incident creation to completion, see the big picture on how your company is performing.

IMPROVE TEAM EFFICIENCY

With PagerTree, your team will be more efficient and benefit from faster resolution times, reduced alert fatigue, and more satisfied customers.
